

URBEUR AND UNIMIB PRESENT

THE NEO-COLONIAL LAND USE PARADIGM: THE CASE OF EAST AFRICA

A seminar on environmental conservation with:

**Francis Moyo PhD, NM-AIST
Arusha (Tanzania)**

30th March, 2023 H: 10:00

Room 24, Building U7

Organized and Hosted by
Ph.D. Candidate Chiara Razzano, Prof.ssa Nunzia Borrelli

Università degli Studi di Milano-Bicocca
Piazza Ateneo Nuovo 1, Milano

How do the interests of various actors articulate in land management and conservation? On what premises do governments and stakeholders collaborate/clash to conserve/manage natural resources?

The seminar will provide insights into the increasing influence of foreign agencies on land use policies in Africa, through the peculiar case of East Africa. The highly controversial case of the Ngorongoro Conservation Area will be presented as an example of how the international conservation agenda affects the local land use paradigm.

Francis Moyo, Ph.D. is currently a lecturer of Political Ecology at the School of Life Science and Bioengineering of Nelson Mandela African Institution of Science and Technology (Arusha, Tanzania). He has a keen interest in equity, justice and knowledge production around natural resources and environmental governance.
