

Article N. 96.

Dear Referee: this is an account of changes affecting version III of the Article, meant to comply with Your advice, for which I thank You very much.

- Article structure: has been de-fragmented by reducing hierarchical levels to two.
- Boundaries between {Introduction, Methodology, Results, Discussion, Conclusion} have been defined.
- The counterpart in Project Management of the general {Materials, Methods, Results} triple has been provided at the end of Sect. IV; the correspondence is suggested by the ISO 21502:2020.
- The original "Project sequel" has been broken down into Sections, separating closed Projects (with respective Deliverables, Outputs, Outcomes) from the main Programme Outcome of Sect. VIII.
- Limitations intrinsic to the "data-driven scheme" and possible changeover to a "model-driven" scheme are addressed at the end of Sect. IX and at the beginning of Sect. X.

Sincerely Yours

Giovanni Franco Crosta.
